

Parasmani Khunte

Full-Stack Engineer · MERN · Local LLM Systems · Distributed Architecture

Bilaspur, CG | +91 7974255514 / +91 8103713757 | parasmanikhunte@gmail.com | github.com/PARASMANI-KHUNTE | [linkedin/parasmani-khunte](https://linkedin.com/parasmani-khunte)

PROFILE

Full-stack engineer with 16+ months of internship experience building production-grade MERN systems, real-time architectures, and AI-integrated applications. Specialises in backend engineering — microservices, distributed systems, WebSockets, and local LLM pipelines. Track record of shipping complete end-to-end systems across fintech, social, and IoT domains. Open to backend-heavy, AI product engineering, and founding engineer roles.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL
AI / LLM	RAG Pipelines, Vector Search (Qdrant, FAISS), Ollama, LangGraph, Groq API, Prompt Engineering, STT/TTS, Vision AI (LLaVA)
Backend	Node.js, Express, REST APIs, WebSockets/Socket.io, JWT, Google OAuth, API Security
Frontend	React, Next.js, React Native, Tailwind CSS, Redux, Zustand, Vite
Data / DB	MongoDB, PostgreSQL, MySQL, Redis (Streams, Pub/Sub, Caching), BullMQ
DevOps	Docker, GitHub Actions, AWS (EC2, S3, IAM, Lambda), OpenTelemetry, Prometheus, Vercel, Render, Cloudinary
Tools	Git, Postman, Linux, Bash, Cursor, Windsurf, VS Code Extension API

SELECTED PROJECTS

MyCircle — Hyperlocal Exchange Platform

2025–2026

React 19 · React Native · Node.js · MongoDB · Socket.io · Redis · BullMQ · Groq AI

- Web + mobile + backend monorepo for local jobs, services, and goods — real-time chat, geospatial discovery, trust scoring, contact-request workflow.
- Groq AI content moderation; Redis caching + BullMQ queues for push notifications and post lifecycle. JWT/Google OAuth, Cloudinary media uploads.

Zuvo — Distributed Microservices Platform

2026

Node.js · TypeScript · Redis Streams · MongoDB · OpenTelemetry · Prometheus · Jaeger · Docker

- 8-service architecture (API Gateway, Auth, Blog, Media, Interactions, Real-time, Worker, Feed & Search) communicating via Redis Streams.
- Full OTel distributed tracing with Prometheus metrics and Jaeger UI; circuit breakers, exponential backoff, dead-letter queues, RGPD-compliant audit logging.

Gravitor — Privacy-First Local AI Coding IDE

2026

VS Code Extension API · TypeScript · Node.js · Ollama · Vector Search · AST Parsing

- VS Code extension with ghost-text code completions powered entirely by local Ollama LLMs — zero data exfiltration by design.
- Context-aware intelligence via heuristic AST parsing + cosine similarity search over local codebase embeddings. Sandboxed CLI execution.

Vaani — Real-Time Messaging Platform

2026

React · Node.js · Express · Socket.io · MongoDB · Cloudinary

- 1-to-1 and group messaging — typing indicators, presence detection, read/delivered states, media/voice sharing, reactions, replies, group admin.

INTERNSHIP EXPERIENCE

Technical Intern — Hybrowlabs Technologies

Mar – May 2025 · Remote

- Delivered 3 client-facing React modules with REST API integration; reduced UI bug backlog by ~40%.
- Built GPS tracking prototype integrating IoT device feed with a real-time web dashboard.

Web Developer Intern — Akkuraa IT Services

Jan – Apr 2025 · Remote

- Built and deployed 2 full-stack MERN apps with scalable APIs, React Native interfaces, and CI/CD on Render/Vercel.

SDE Intern — Bluestock Fintech

Nov – Dec 2024 · Remote

- Built fintech-grade REST APIs with auth middleware, RBAC, and Postman-based testing workflows.

Full Stack Intern — Elite Tech

Oct – Nov 2024 · Remote

- Built Photoshare social platform with JWT auth, real-time Socket.io updates, and Cloudinary image uploads.

EDUCATION & LEADERSHIP

MCA, Computer Science & Technology — Guru Ghasidas Vishwavidyalaya

2025–2027 · In Progress

BCA, Computer Science — Guru Ghasidas Vishwavidyalaya

2022–2025 · CGPA: 8.20

IoT Executive, GFG Student Chapter GGU — led Arduino/Raspberry Pi workshops for 50+ students; represented university at Smart India Hackathon.
