

Parasmani Khunte

Full-Stack Engineer | Backend & Distributed Systems | Local LLM / RAG Systems

Bilaspur, Chhattisgarh • +91 8103713757 • parasmanikhunte@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 1+ year of internship and freelance experience building production-grade systems: distributed microservices architecture, MERN-stack applications, and local-LLM-powered products (RAG, on-device inference). Comfortable across the stack, with the strongest depth in backend design, observability, and system reliability.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL

Backend: Node.js, Express.js, REST APIs, JWT, OAuth, Socket.io, Microservices, Circuit Breakers, OpenTelemetry

Frontend: React, Next.js, React Native, Tailwind CSS, Redux

Databases: MongoDB, PostgreSQL, MySQL, Redis, Qdrant

DevOps: Docker, GitHub Actions, Linux, Git

AI/LLM: LangGraph, Ollama, Groq API, FAISS, Qdrant, Prompt Engineering, RAG pipelines

EXPERIENCE

Full Stack Developer (Freelance) — *Akkuraa IT Services*

June 2025 – Aug 2025

- Built full-stack web applications end-to-end using the MERN stack, from schema design through deployment.
- Designed and built REST APIs consumed by React frontends, including auth flows and state management with Redux.
- Deployed and maintained applications on Render and Vercel, managing environment configs and CI redeploys.

Technical Intern — *Hybrowlabs Technologies*

Mar 2025 – May 2025 (part-time, concurrent with Akkuraa)

- Built React features and integrated REST APIs for production functionality used by live users.
- Developed a GPS tracking prototype (geolocation capture, map rendering, live position updates) for location-based product functionality.

Web Developer Intern — *Akkuraa IT Services*

Jan 2025 – Apr 2025 (part-time, concurrent with Hybrowlabs (Mar–Apr))

- Built MERN stack applications end-to-end: React frontends, Node.js/Express backends, MongoDB schemas.
- Built backend REST APIs and reusable frontend components adopted across multiple client projects.

SDE Intern — *Bluestock Fintech*

Nov 2024 – Dec 2024

- Built and secured REST APIs for a fintech application, implementing JWT-based authentication and role-based authorization.
- Debugged production backend services, tracing and resolving issues in request handling and data validation to improve reliability.

PROJECTS

Zuvo — *Node.js, Docker, Redis Streams, OpenTelemetry, Microservices*

- Designed and built an 8-service distributed microservices platform with independent service boundaries, inter-service communication via Redis Streams, and circuit breakers for graceful degradation.
- Instrumented every service with OpenTelemetry for distributed tracing and observability, enabling request-level tracing across service boundaries.

Kimiko — *FastAPI, Qdrant, Redis, PostgreSQL, Celery, Ollama*

- Built a RAG middleware layer that indexes documents into Qdrant and serves retrieval-augmented completions through locally hosted Ollama models, with FastAPI + PostgreSQL for the service layer.
- Used Celery with Redis as a broker to handle async document ingestion and embedding jobs without blocking API responses — the whole pipeline runs on local/on-prem infrastructure with no external LLM API dependency.

MyCircle — *React, React Native, Node.js, MongoDB, Redis, BullMQ, Socket.io*

- Built a production-ready hyperlocal social platform with JWT + Google OAuth authentication and Cloudinary-backed media uploads.
- Implemented real-time chat and notifications with Socket.io, backed by BullMQ for background job processing.
- Added AI-powered content moderation and geospatial discovery (location-based feed ranking) on top of a scalable backend architecture.

Vaani — *Node.js, Socket.io, MongoDB, JWT*

- Developed a real-time messaging platform supporting one-to-one and group chat, with typing indicators and presence detection.
- Implemented media sharing and JWT-based authentication across both individual and group conversation flows.

EDUCATION

MCA, Guru Ghasidas Vishwavidyalaya (2025 – Present)

BCA, Guru Ghasidas Vishwavidyalaya (2022 – 2025) | CGPA: 8.20
